INTERNSHIP EXPERIENCE

AI Data Quality Analytics | Rooman Technologies

Feb 25- May 25

- Optimized data analysis and reporting, streamlining collection processes for a 20% efficiency boost.
- Implemented automation solutions, enhancing productivity by 15% through intelligent robotics integration.
- Collaborated with cross-functional teams, aligning project objectives and driving strategic insights.

ACADEMIC PROJECT

Two Bit Overlap: A Class of Double Error Correction One Step Majority Logic Decodable Codes | VLSI

- Designed and developed a double-error correction system using two-bit overlap logic to enhance fault tolerance in digital communication.
- Integrated one-step majority logic decoding for efficient error recovery, minimizing computational complexity.
- Conducted rigorous testing and simulations to validate performance in real-world scenarios.
